

ERPInfinity – Multi-Tenant SaaS & Enterprise Retail ERP Blueprint

> **Product Vision:** Dual-Market Retail ERP Platform > **Target Audience A (SaaS / Small Shopkeepers):** Single-Store Retailers, Grocery Stores, Local Marts (Quick POS Billing, Inventory, Online Storefront, WhatsApp Invoices). > **Target Audience B (Enterprise Chains / DMart):** Large Supermarkets & Multi-Branch Enterprise Chains (Central HQ Control, Multi-Warehouse Logistics, Multi-Counter POS, General Ledger Accounting). ---

1. Business & Product Strategy

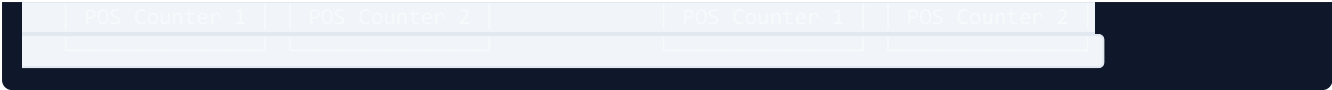

ERPInfinity is architected to serve both ends of the retail market through a scalable **Multi-Tenant Architecture**:

2. Multi-Tenant & Multi-Branch Organizational Hierarchy

Every entity in the database is scoped by `TenantId` and optionally `BranchId` :

3. Data Isolation Architecture

To balance cost-efficiency for small shopkeepers with maximum security for Enterprise chains, **ERPInfinity** uses a **Hybrid Isolation Strategy**:

3.1 Tenant Isolation Levels

1. **Shared Database (Discriminator Model - Small Shops):** - Tables contain a `TenantId` column indexed as a composite key (e.g. `IX_Stocks_TenantId_SKUId`). - Low infrastructure cost; supports thousands of shopkeepers per database instance. 2. **Isolated Database (Dedicated Model - DMart / Big Sharks):** - Enterprise client receives an isolated database set (`ERPInfinity_DMart_Identity` , `ERPInfinity_DMart_Product` , etc.). - Guarantees strict data privacy, custom compliance, and independent database backups. ---

4. SaaS vs Enterprise Feature Matrix

Feature	Lite Plan (Small Shopkeepers)	Pro Plan (Supermarkets)	Enterprise Plan (DMart / Chains)
Target User	Kirana / Single Store	Multi-Counter Mart	Enterprise Hypermarket Chain
Max Stores / Branches	1 Store	Up to 3 Stores	Unlimited Branches
POS Billing Counter	1 Web / Mobile POS	Up to 5 Counters	Unlimited POS Counters
Barcode Scanning	Yes (Sub-2ms)	Yes	Yes (Hardware Integration)
Online E-Commerce Shop	Auto-Generated Storefront	Auto-Generated Storefront	Branded Web & Mobile App
WhatsApp Invoicing	Included	Included	Custom SMS / WhatsApp Gateway
Inventory Management	Basic Stock Tracking	Stock + Low Stock Alerts	Multi-Warehouse & Bin Tracking
Procurement & PO	Basic Vendor Log	Purchase Orders & GRN	Multi-Level PO Approvals & Vendors
